

# GET READY FOR ALL STANDARDIZED TESTS!

## GradeWrite™ V 2.0

Simple Solutions for Educators by Educators

### Product Description

GradeWrite is a standards-based grading program with integrated lesson planning, attendance and data analysis laboratory. The integration of all of these features into one application is critical for today's teachers when striving to meet AYP.

### Features & Benefits

- Identifies each State and Achievement Test subject-level Standard and tracks individual student progress toward the standard at the push of a button
- Fully featured grade-book with ability to include subject-matter standards and proficiencies.
- Easy to use Data Analysis Lab providing data-driven assessment tools.
- Ability to import student, assignment and grade information from other programs.
- Ability to export student, assignment and grade information to other database and spreadsheet programs.
- Report generation for students, parents and educators.
- Integrated Lesson Planner
- Integrated Attendance
- Incorporates Best Practices in Grading
- Data Analysis reports that provide a solid basis for making well-informed, data-driven decisions
- Ability to post grades on the World Wide Web.
- Includes Standards Resource for all 50 states!

The screenshot displays the GradeWrite 2.0.4 application window. The main window shows a student gradebook with columns for student names, scores, and assignments. A 'Where To Focus' dialog box is open, showing a list of assignments and their scores. The background shows a data analysis lab with a Pareto chart titled 'Pareto: Term 01 - Geometry' and a 'Grade Patterns' section.

#	Name	Scale	Score	mi	Initial Exam	Homework 1	Homework 2	Homework 3
