

Highly Qualified Prep™

Building America's Future.™

Product Description

The Math Learning Institute is committed to providing educators with the necessary tools to be effective in mathematics instruction. The Basic Skills workshop provides educators with the necessary skills and confidence for passing the PLACE and PRAXIS subject exams in mathematics. Participants will receive a workbook and have an opportunity to practice their newly acquired techniques.

New Features

The 'No Child Left Behind' legislation requires that all teachers be 'highly qualified'. This workshop is essential for providing the tools that would make this vision a reality. The aim is to institutionalize a continual improvement process and achieve a technology transfer from our experts to your leaders. The workshop identifies the common mistakes and pitfalls that are made on the Mathematics examinations by previous test-takers. Participants will leave the workshop more confident and self-assured in their ability to pass the examination

Benefits

- **Benefit One —**
Structured approach to studying for the PLACE and PRAXIS exams.
- **Benefit Two —**
Participants reinforce their learning by forming study teams
- **Benefit Three —**
Training performed by certified staff.
- **Benefit Four —**
Guaranteed to pass the examination otherwise your re-enrollment is free!

Target Market:
All teachers within a school district.

Requirements:
Two to five day workshop.
