

Mathematical Rediscovery™

Building America's Future.™

Product Description

The current focus on standardized testing nationwide has precipitated a need to improve teacher effectiveness in mathematics.

This workshop for teachers is designed to solidify the core concepts of mathematics for which they are responsible. The course focuses on building teacher confidence in mathematics through a series of exercises. Participants will acquire new skills in mathematics that would support a more rigorous curriculum.

New Features

This course promotes student achievement through a focused approach to teacher development in mathematics. Participants become aware of the gaps in understanding in various topics in math. Participants will also focus on solidifying their understanding of relevant topics through workshop exercises.

Benefits

- **Benefit One —**
Refresher courses in the following subjects:
Algebraic Concepts, Pre-Algebra, Data Interpretation, Algebra I & II, Mathematical Processes, Geometry, Measurement, Trigonometry, Numeration, Pre-Calculus, Whole Numbers, Calculus I & II, Statistics
- **Benefit Two —**
Professional support for a rigorous math curriculum and lesson plans
- **Benefit Three —**
Limited class size

Target Market:
All teachers within a school district.

Requirements:
Two to five day workshop.
